OMB Control Number: 0694-0120 Expiration Date: December 31, 2020

SCOPE OF ASSESSMENT

The U.S. Department of Commerce, Bureau of Industry and Security (BIS), Office of Technology Evaluation (OTE), is conducting a survey of the U.S. vanadium industry. The survey results will be used to support an ongoing investigation on the effect of imports of vanadium products on the U.S. national security initiated under Section 232 of the Trade Expansion Act of 1962, as amended.

The principal goal of this survey is to assist the U.S. Department of Commerce in determining whether vanadium imports are being imported into the United States in such quantities or under such circumstances as to threaten to impair the national security. Information collected will include facilities and production data, capacity utilization, customers, sales and demand data, employment information, conditions of domestic and global competition, research and development, and other factors. The resulting data will provide the U.S. Department of Commerce detailed vanadium industry information that is otherwise not publicly available and needed to effectively conduct this Section 232 investigation.

RESPONSE TO THIS SURVEY IS REQUIRED BY LAW

A response to this survey is required by law (50 U.S.C. Sec. 4555). Failure to respond can result in a maximum fine of \$10,000, imprisonment of up to one year, or both. Information furnished herewith is deemed confidential and will not be published or disclosed except in accordance with Section 705 of the Defense Production Act of 1950, as amended (50 U.S.C. Sec. 4555). Section 705 prohibits the publication or disclosure of this information unless the President determines that its withholding is contrary to the national defense. Information will not be shared with any non-government entity, other than in aggregate form. The information will be protected pursuant to the appropriate exemptions from disclosure under the Freedom of Information Act (FOIA), should it be the subject of a FOIA request.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.

BURDEN ESTIMATE AND REQUEST FOR COMMENT

Public reporting burden for this collection of information is estimated to average 10 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information to BIS Information Collection Officer, Room 6883, Bureau of Industry and Security, U.S. Department of Commerce, Washington, D.C. 20230, and to the Office of Management and Budget, Paperwork Reduction Project (OMB Control No. 0694-0120), Washington, D.C. 20503.

BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act

Previ	ous Page
	General Instructions
	Your organization is required to complete this survey of the U.S. vanadium industry, which can be downloaded from the BIS website: http://www.bis.doc.gov/Vanadium232
А.	If you are unable to download the survey document, at your request, BIS survey support staff will e-mail the Excel survey template directly to you.
	For your convenience, a PDF version of the survey and required drop-down content is available on the BIS website to aid internal data collection. DO NOT SUBMIT the PDF version of the survey as your response to BIS. Should this occur, your organization will be required to resubmit the survey in the requested Excel format.
	Respond to every question. Surveys that are not fully completed will be returned for completion. Use the comment boxes to provide any information to supplement responses provided in the survey form. Make sure to record a complete answer in the space provided, even if the space does not appear to expand to fit all of the information.
В.	DO NOT CUT AND PASTE RESPONSES WITHIN THIS SURVEY OR PASTE IN RESPONSES FROM OUTSIDE THE SURVEY. Survey inputs should be completed by typing in responses or by using a drop-down menu. The use of cut and paste can corrupt the survey template. If your survey response is corrupted as a result of cut and paste response, your survey will be rejected and your organization must immediately resubmit the survey.
C.	Do not disclose any USG classified information in this survey form.
D.	Upon completion of the survey, final review, and certification, transmit the survey document via e-mail to: Vanadium232@bis.doc.gov
	Questions related to the survey should be directed to BIS survey support staff at Vanadium232@bis.doc.gov
E.	E-mail is the preferred method of contact.
	You may speak with a member of the BIS survey support staff by calling (202) 482-5481.
	For questions related to the overall scope of this Section 232 Investigation, contact <u>Vanadium232@bis.doc.gov</u> or:
	Jason D. Bolton Program Manager, Industrial Studies
_	BIS/Export Administration/Office of Technology Evaluation
F.	1401 Constitution Avenue, NW, Room 1093
	Washington, DC 20230
	DO NOT submit completed surveys to Mr. Bolton's postal or personal e-mail address. All surveys must be submitted electronically to: Vanadium232@bis.doc.gov
	BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act

	Definitions
Term	Definition
Authorizing Official	An executive officer of the organization or business unit or another individual who has the authority this survey on behalf of the organization.
Capital Expenditures	Investments made by an organization in buildings, equipment, property, and systems where the experiment of the expenditures for consumable materials, other operating expenses associated with normal business operations.
Co-Production	The process of extracting vanadium from titaniferous magnetite ores during steel production.
Critical Infrastructure	Sectors whose assets, systems, and networks, whether physical or virtual, are considered so vital to States that their incapacitation or destruction would have a debilitating effect on security, national security, national public health and safety, or any combination thereof.
Customer	Any organization (external or internal entity) for which your organization manufactures/processes a comprised of, or containing, steel in any form.
Defense-related Sales/Activities	Any product or service that your organization produces that is ultimately used by the U.S. Governm defense purposes, whether by the armed services, the Department of Defense, or any other U.S. Go entity.
Development	The design, simulation, and testing of a prototype, including experimental software or hardware systems prior to production approval.
Distributor	An independent selling agent who has a contract to sell the products of a manufacturer.
Exports	Shipments to destinations outside the United States.
Facility	A building or the minimum complex of buildings or parts of buildings that conduct steel production, organization operates to serve a particular function, producing revenue, and incurring costs for the facility may produce an item of tangible or intangible property or may perform a service. It may end floor or group of floors within a building, a single building, or a group of buildings or structures. Ofte a group of related locations at which organization employees work, together constituting a profit-au for the company, and it may be identified by a unique DUNS number.
Full Time Equivalent (FTE) Employees	Employees who work for 40 hours in a normal work week. Convert part-time employees into "full ti equivalents" by taking their work hours as a fraction of 40 hours.
Global Headquarters	A location that serves as the organization's hub of worldwide operations with all global branches or reporting to it.
Harmonized Tariff Schedule (HTS)	A 10-digit numbering system that classifies a good based on its name, use, and/or the material used construction. The number provides Customs and Border Protection (CBP) with a standardized meth all merchandise imported into the United States and sets out the tariff rates and statistical categories.
High Purity Vanadium Pentoxide	Vanadium pentoxide of at least 99% percent purity.
Import Value	Values reported should be landed, duty-paid values at the U.S. port of entry, including ocean freight insurance costs, brokerage charges, and import duties (i.e., all charges except inland freight in the U
Inventory	The goods or materials an organization holds for its own use or for the ultimate goal of sale.

	Definitions
Term	Definition
Non-U.S. Facility	A facility that is physically located outside of the United States.
Organization	A company, firm, laboratory, or other entity that owns or controls one or more U.S. establishment o capable of designing and/or manufacturing steel products.
Primary/By-Product Production	The process of producing vanadium products from mining operations or in conjunction with mining of for other minerals.
Product/Process Development	Conceptualization and development of steel product or steel production techniques prior to the pro- the product for customers (i.e., utilities, governmental agencies etc.).
Production	The process of transforming inputs (raw materials, semi-finished goods, subassemblies, ideas, inform knowledge) into goods or services.
Research & Development	Basic and applied research in the engineering sciences, as well as design and development of prototy and processes. Efforts that an organization conducts towards innovating, introducing and/or improv and processes.
Sales	All reported and unreported sales of steel, including sales to end-users, producers, financial entities, intermediaries, traders, distributors, et al.
Secondary Production	The process of transforming waste materials (spent catalyst, slag, ash, residues, etc.) into vanadium including vanadium pentoxide, ferrovanadium, vanadium metals, and metal alloys that contain vana
Single Source	An organization that is designated as the only accepted source for the supply of parts, components, services, even though other source with equivalent technical know-how and production capability m
Sole Source	An organization that is the only source for the supply of parts, components, or services. No alternation non-U.S. based suppliers exist other than the current supplier.
Supplier	An entity from which your organization obtains inputs, which may be goods or services. A supplier m another organization with which you have a contractual relationship, or it may be another facility ow same parent organization.
Tipping/Recycling Fees	Fees collected for the recycling of waste or other vanadium-bearing products (Ash, Residues, Spent C Vanadium Slag, Etc.) into vanadium products. This includes fees collected by secondary vanadium products during the recycling of vanadium-bearing feedstocks into vanadium products.
Toll Production/Conversion Services	The process of converting one form of vanadium, typically vanadium pentoxide, into another form o typically ferrovanadium.
Tollee	The firm who furnished inputs (i.e. vanadium pentoxide) to the Toller for conversion into a different product (i.e. ferrovanadium).
Toller	The firm who converted/produced vanadium inputs (i.e. vanadium pentoxide) into a different vanad (i.e. ferrovanadium) for the Tollee.
Vanadium Master Alloys	Master alloys produced from high purity vanadium pentoxide, including Aluminum-Vanadium maste (often containing 35% aluminum and 64.5% vanadium).
United States	The "United States" or "U.S." includes the 50 states, Puerto Rico, the District of Columbia, Guam, the Territories, and the U.S. Virgin Islands.

3a. U.S. Production

In Part A, identify which vanadium products your organization has capabilites in, or could develop capabilities. Provide the requested details on production requirements. In Part B, record the total annual quantity of each subject product your organization produced from 2016-2020 (YTD July). Remember to confirm the units of measurement organization is a tollee (i.e. provides material to a toller for conversion), do not record this production below.

If you only distribute and do not manufacture or plan to manufacture any of the subject vanadium products, indicate so here and move to the next section.
