other person (except an airman serving as an airman) not operating an aircraft for the transportation of passengers or property for compensation. For violations that occurred after November 2, 2015, $13,910 per violation, up to a total of $556,419 per civil penalty action, in the case of any other person (except an airman serving as an airman) not operating an aircraft for the transportation of passengers or property for compensation. (3) For violations that occurred on or before November 2, 2015, $25,000 per violation, up to a total of $400,000 per civil penalty action, in the case of a person operating an aircraft for the transportation of passengers or property for compensation (except an individual serving as an airman). For violations that occurred after November 2, 2015, $34,777 per violation, up to a total of $556,419 per civil penalty action, in the case of a person (except an individual serving as an airman) operating an aircraft for the transportation of passengers or property for compensation.

Chad R. Mizelle, Senior Official Performing the Duties of the General Counsel.

DEPARTMENT OF COMMERCE
Bureau of Industry and Security

15 CFR Parts 748 and 774
[Docket No. 200521–0143]
RIN 0694–AH60

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Industry and Security (BIS) publishes this final rule to amend the Export Administration Regulations (EAR) to implement the decisions made at the February 2020 Australia Group (AG) Intersessional Implementation Meeting, and those later adopted pursuant to the AG’s silence procedure. Specifically, this rule amends Export Control Classification Numbers (ECCNs) 1C350, 1C351 and 2B352 on the Commerce Control List (CCL) to reflect these AG changes. ECCN 1C350 is amended by adding twenty-four precursor chemicals, as well as mixtures in which at least one of these chemicals constitutes 30 percent or more of the weight of the mixture, to ECCN 1C350.d. ECCN 1C351 is amended to add Middle East respiratory syndrome-related coronavirus (MERS-related coronavirus). ECCN 2B352 is amended by adding a Technical Note to indicate that cultivation chamber holding devices controlled in 2B352.b.2.b include single-use cultivation chambers with rigid walls. The items addressed by this final rule were not previously listed on the CCL or controlled multilaterally. BIS, consistent with the interagency process described in the Export Control Reform Act of 2018 (ECRA), identified the precursor chemicals and single-use cultivation chambers addressed by this final rule as emerging technologies that are essential to U.S. national security and for which effective controls can be implemented. The inclusion of such items in this final rule is consistent with the requirements of ECRA and the decision of the AG to add such items to its common control lists, thereby making exports of such items subject to multilateral control (following the implementation of these changes by individual AG participating countries, including the United States).

DATES: This rule is effective June 17, 2020.

FOR FURTHER INFORMATION CONTACT: Dr. Wesley Johnson, Chemical and Biological Controls Division, Office of Nonproliferation and Treaty Compliance, Bureau of Industry and Security, Telephone: (202) 482–0091, Email: Wesley.Johnson@bis.doc.gov.

SUPPLEMENTARY INFORMATION: The Bureau of Industry and Security (BIS) is amending the Export Administration Regulations (EAR) to implement the decisions made at the Australia Group (AG) Intersessional Implementation Meeting held in Bratislava, Slovak Republic, on February 5 through 6, 2020, and those subsequently made pursuant to the AG silence procedure which ended on February 28, 2020 (the AG silence procedure provides for the adoption of a measure, subsequent to its provisional acceptance at an AG plenary or intersessional meeting, provided that no participating country submits an objection on or before a specified date). The AG is a multilateral forum consisting of 42 participating countries and the European Union that maintain export controls on a list of chemicals, biological agents, and related equipment and technology that could be used in a chemical or biological weapons program. The AG periodically reviews items on its control list to enhance the effectiveness of participating governments’ national controls and to achieve greater harmonization among these controls.

Amendments to the CCL Based on the February 2020 AG Intersessional Recommendations

ECCN 1C350 (Chemical Weapons Precursors)

This final rule amends Export Control Classification Number (ECCN) 1C350 on the Commerce Control List (CCL) (Supplement No. 1 to part 774 of the EAR) to reflect changes to the AG “Chemical Weapons Precursors” common control list based on the February 2020 Intersessional Implementation Meeting recommendations that were approved by the AG pursuant to a silence procedure which ended on February 28, 2020. Specifically, this rule amends ECCN 1C350 by adding the following twenty-four precursor chemicals under ECCN 1C350.d:

- (C.A.S. #589–57–1) Diethyl chlorophosphite;
- (C.A.S. #762–77–6) Ethyl chlorofluorophosphate;
- (C.A.S. #1498–51–7) Ethyl dichlorophosphate;
- (C.A.S. #460–52–6) Ethyl difluorophosphate;
- (C.A.S. #754–01–8) Methyl chlorofluorophosphate;
- (C.A.S. #677–24–7) Methyl dichlorophosphate;
- (C.A.S. #22382–13–4) Methyl difluorophosphate;
- (C.A.S. #14277–06–6) N,N-Diethylacetamidine;
- (C.A.S. #53510–30–8) N,N-Diethylbutanamidine;
- (C.A.S. #90324–67–7) N,N-Diethylformamidine;
- (C.A.S. #1342789–47–2) N,N-Diethylisobutanamidine;
- (C.A.S. #84764–73–8) N,N-Diethylpropanamidine;
- (C.A.S. #1315467–17–4) N,N-Diisopropylbutanamidine;
- (C.A.S. #857522–08–8) N,N-Diisopropylformamidine;
- (C.A.S. #2909–14–0) N,N-Dimethylacetamidine;
- (C.A.S. #1340427–35–5) N,N-Dimethylbutanamidine;
- (C.A.S. #44205–42–7) N,N-Dimethylformamidine;
- (C.A.S. #321881–25–8) N,N-Dimethylisobutanamidine;
- (C.A.S. #36776–14–8) N,N-Dimethylpropanamidine;
- (C.A.S. #133986–99–0) N,N-Dipropylacetamidine;
In addition, although this rule does not amend ECCN 1D390 ("software" for chemical production process control), ECCN 1E001 ("technology" for the "development" or "production" of, inter alia, precursor chemicals controlled by ECCN 1C350), ECCN 1E350 ("technology" for chemical production facilities) or ECCN 1E351 ("technology" for the disposal of, inter alia, precursor chemicals), these ECCNs cross-reference items controlled by ECCN 1C350 and, consequently, "software" or "technology" that is related to any of the twenty-four precursor chemicals added by this rule to ECCN 1C350. d is now subject to control under ECCN 1D390, 1E001, 1E350 or 1E351 if such "software" or "technology" falls within the parameters of the controls described therein.

Prior to the addition of these twenty-four precursor chemicals to the AG chemical weapons precursors common control list, BIS, consistent with the interagency process described in the Export Control Reform Act of 2018 (ECRA) (50 U.S.C. 4801–4852) under Section 1758 (codified at 50 U.S.C. 4817), identified these items as emerging technologies that are essential to U.S. national security and for which effective controls can be implemented. This interagency process resulted in a finding that the absence of export controls on these precursor chemicals could be exploited for chemical weapons purposes. The inclusion of these precursor chemicals in this final rule is consistent with the requirements of ECRA and the decision of the AG to add these items to their common control lists, thereby making exports of such items subject to multilateral control.

This rule alphabetically reorders the precursor chemicals listed in ECCN 1C350.d to reflect the addition of the twenty-four precursor chemicals identified above. To assist in identifying the precursor chemicals that are now controlled under ECCN 1C350.d, the following table lists each chemical now found in ECCN 1C350.d, as well as the previous ECCN 1C350.d listing (if any) for these chemicals.

Note that all items controlled under ECCN 1C350.d, including the newly added precursor chemicals described above, are controlled for chemical/biological (CB) reasons and anti-terrorism (AT) reasons (see CB Column 2 of the Commerce Country Chart in Supplement No. 1 to part 738 of the EAR and the AT license requirements described in part 742 of the EAR that apply to Iran, North Korea, Sudan and Syria). A license also is required to certain destinations in accordance with the embargoes and other special controls described in part 746 of the EAR.

ECCN 1C351 (Human and Animal Pathogen and Toxins)

This final rule amends ECCN 1C351 on the CCL to reflect changes to the AG “Control List of Human and Animal Pathogens and Toxins” based on the February 2020 Intersessional Implementation Meeting recommendations that were adopted by AG. Specifically, this rule adds the Middle East respiratory syndrome-related coronavirus (MERS-related coronavirus) to ECCN 1C351.a.30 due to its homology with severe acute respiratory syndrome-related coronavirus (SARS-related coronavirus) and its potential use in biological weapons activities. The viruses in ECCN 1C351.a that were previously numbered, in alphabetical order, as .a30 through .a57 have been renumbered as .a31 through .a58, respectively, and relevant cross-references adjusted as necessary.

In addition, although this rule does not amend ECCN 1E001 (“technology” for the “development” or “production” of, inter alia, pathogens or “toxins” controlled by ECCN 1C351) or ECCN 1E351 (“technology” for the disposal of, inter alia, microbiological materials), these ECCNs cross-reference items controlled by ECCN 1C351 and, consequently, “technology” that is related to the MERS-related coronavirus added by this rule to ECCN 1C351.a.30 is now subject to control under ECCN 1E001 or 1E351 if such “technology” falls within the parameters of the controls described therein.

Note that all items controlled under ECCN 1C351.d, including the newly added precursors, are controlled for CB reasons and AT reasons to the destinations indicated under CB Column 1 and AT Column 1, respectively, on the Commerce Country Chart in Supplement No. 1 to part 738 of the EAR (also see the AT license requirements described in part 742 of the EAR that apply to Iran, North Korea, Sudan and Syria). In addition, a license is required to certain destinations in accordance with the embargoes and other special controls described in part 746 of the EAR. Also note that, in addition to the license requirements described above, items controlled under ECCN 1C351.d.11 or .d.12 require a license to certain destinations for chemical weapons (CW) reasons, as described in the License Requirements section of ECCN 1C351 and in Section 742.18 of the EAR.

ECCN 2B352 (Equipment Capable of Use in Handling Biological Materials)

This final rule amends ECCN 2B352 on the CCL to reflect changes to the AG “Control List of Dual-Use Biological Equipment and Related Technology and Software” based on the February 2020 Intersessional Implementation Meeting recommendations that were adopted by the AG. Specifically, this rule adds a Technical Note to ECCN 2B352.b.2 to indicate that cultivation chamber holding devices controlled in 2B352.b.2.b include single-use cultivation chambers with rigid walls. Consequently, such single-use cultivation chambers require a license for CB reasons and AT reasons to the destinations indicated under CB Column 2 and AT Column 1, respectively, on the Commerce Country Chart in Supplement No. 1 to part 738 of the EAR (also see the AT license requirements described in part 742 that apply to Iran, North Korea, Sudan and Syria). A license also is required to certain destinations in accordance with the embargoes and other special controls described in part 746 of the EAR.

In addition, although this rule does not amend ECCNs 2E001, 2E002 and 2E301 (which control, respectively, “technology” for the “development,” “production” or “use” of, inter alia, ECCN 2B352 equipment), these ECCNs cross-reference items controlled by ECCN 2B352 and, consequently, “technology” that is related to rigid-walled, single-use cultivation chambers added by this rule to ECCN 2B352.b.2.b is now subject to control under ECCN 2E001, 2E002 or 2E301 if such “technology” falls within the parameters of the controls described therein.

Prior to the addition of these cultivation chambers to the AG biological equipment common control list, BIS, consistent with the interagency process described in Section 1758 of ECRA, identified these items as emerging technologies that are essential to U.S. national security and for which effective controls can be implemented. This interagency process resulted in a finding that disposable cultivation chambers that do not require the use of a holding device have recently gained significant market share in the single-use biological equipment market (both within and outside the United States) and, furthermore, that they are capable of functioning as cultivation chamber holding devices controlled under ECCN 2B352.b.2.b. Consequently, the absence of export controls on these single-use cultivation chambers could be exploited for chemical and biological weapons (CBW) purposes. Among the items of concern, in this regard, are impeller-mixed liquid culture chambers, as well as novel packed-bed and hollow-fiber models. The inclusion of these cultivation chambers in this final rule is consistent with the requirements of ECRA and the decision of the AG to add these items to their common control lists, thereby making exports of such items subject to multilateral control.

Conforming Changes to Supplement No. 7 to Part 748

This final rule also amends Supplement No. 7 to part 748 to update the ECCN reference to hydrogen fluoride (C.A.S. #7664–39–3) in the eligible item descriptions for the following validated end-users: (1) “Samsung China Semiconductors Co. Ltd.” and (2) “Shanghai Huahong Grace Semiconductor Manufacturing Corporation.” As described above, hydrogen fluoride was previously classified under ECCN 1C350.d.10, but is now classified under ECCN 1C350.d.14 with the publication of this rule. These conforming amendments do not change the scope of eligible items for either of the two validated end-users indicated above—they merely update the ECCN references in Supplement No.
7 to part 748 to correctly identify which ECCN 1C350.d items are eligible for each of these validated end-users. Because this rule does not add or remove any validated end-users or revise the scope of eligible items, the citation for this rule is not indicated in the “Federal Register Citation” column of Supplement No. 7.

**Saving Clause**

Shipments of items removed from eligibility for export, reexport or transfer (in-country) under a license exception or without a license (i.e., under the designator “NLR”) as a result of this regulatory action that were on dock for loading, on lighter, laden aboard an exporting carrier, or en route aboard a carrier to a port of export, on June 17, 2020, pursuant to actual orders for export, reexport or transfer (in-country) to a foreign destination, may proceed to that destination under the previously applicable license exception or without a license (NLR) so long as they are exported or transferred (in-country) before August 17, 2020. Any such items not actually exported, reexported or transferred (in-country) before midnight, on August 17, 2020, require a license in accordance with this regulation.

“Deemed” exports of “technology” and “source code” removed from eligibility for export under a license exception or without a license (under the designator “NLR”) as a result of this regulatory action may continue to be made under the previously available license exception or without a license (NLR) before August 17, 2020. Beginning at midnight on August 17, 2020, such “technology” and “source code” may no longer be released, without a license, to a foreign national subject to the “deemed” export controls in the EAR when a license would be required to the home country of the foreign national in accordance with this regulation.

**Export Control Reform Act of 2018**

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA), 50 U.S.C. Sections 4801–4852. ECRA provides the legal basis for BIS’s principal authorities and serves as the authority under which BIS issues this rule. As set forth in section 7168 of ECRA, all delegations, rules, regulations, orders, determinations, licenses, or other forms of administrative action that were made, issued, conducted, or allowed to become effective under the Export Administration Act of 1979 (previously, 50 U.S.C. 4601 et seq.) (as in effect prior to August 13, 2018, and as continued in effect pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701 et seq.)) or the Export Administration Regulations, and were in effect as of August 13, 2018, shall continue in effect according to their terms until modified, superseded, set aside, or revoked under the authority of ECRA.

**Rulemaking Requirements**

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including: Potential economic, environmental, public health and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits and of reducing costs, harmonizing rules, and promoting flexibility. This rule has been designated a “significant regulatory action,” although not economically significant, under section 3(f) of Executive Order 12866. Accordingly, the rule has been reviewed by the Office of Management and Budget.

The cost-benefit analysis required pursuant to Executive Orders 13563 and 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including: Potential economic, environmental, public health and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits and of reducing costs, harmonizing rules, and promoting flexibility. This rule has been designated a “significant regulatory action,” although not economically significant, under section 3(f) of Executive Order 12866. Accordingly, the rule has been reviewed by the Office of Management and Budget.

The cost-benefit analysis required pursuant to Executive Orders 13563 and 12866 indicates that this rule is intended to improve national security as its primary direct benefit. Specifically, implementation, in a timely manner, of the Australia Group (AG) agreements described herein will enhance the national security of the United States by reducing the risk that global international trade involving dual-use chemical and biological items would contribute to the proliferation of chemical and biological weapons of mass destruction. The principal objective of AG participating countries is to use licensing measures to ensure that exports of certain chemicals, biological agents, and dual-use chemical and biological manufacturing facilities and equipment, do not contribute to the proliferation of chemical and biological weapons of mass destruction, which has been identified as a threat to domestic and international peace and security. The AG achieves this objective by harmonizing participating countries’ national export licensing measures. These controls are essential given that the international chemical and biotechnology industries are a target for proliferators as a source of materials for chemical and biological weapons programs.

In calculating the costs that will be imposed by this rule, BIS estimates that no more than 25 additional license applications will have to be submitted to BIS, annually, as a result of the implementation of the amendments described in this rule (see Rulemaking Requirements #2, below). Application of the cost-benefit analysis required under Executive Orders 13563 and 12866 to this rule, as described above, indicates that this rule is intended to improve the national security of the United States as its primary direct benefit. Accordingly, consistent with the stated purpose of the proposed amendments to ECCNs 1C350, 1C351 and 2B352, this rule meets the requirements set forth in the April 5, 2017, OMB guidance implementing Executive Order 13771 (82 FR 9339, February 3, 2017), regarding what constitutes a regulation issued “with respect to a national security function of the United States,” and it is, therefore, exempt from the requirements of E.O. 13771.

2. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This rule contains the following collections of information subject to the requirements of the PRA. These collections have been approved by OMB under control numbers 0694–0088 (Simplified Network Application Processing System) and 0694–0096 (Five Year Records Retention Period). The approved information collection under OMB control number 0694–0088 includes license applications, among other things, and carries a burden estimate of 29.6 minutes per manual or electronic submission for a total burden estimate of 31,833 hours. The approved information collection under OMB control number 0694–0096 includes recordkeeping requirements and carries a burden estimate of less than 1 minute per response for a total burden estimate of 248 hours.

Although this rule contains important changes to the EAR for items controlled for chemical/biological (CB) reasons, BIS believes the overall increase in costs and burdens due to the implementation of these changes will be minimal. Specifically, BIS expects the burden hours associated with these collections will increase, with by 12 hours and 45 minutes (i.e., 25 applications × 30.6 minutes per response) for a total
3. This rule does not contain policies with Federalism implications as that term is defined in Executive Order 13132.

4. Pursuant to Section 1762 of the Export Control Reform Act of 2018 (50 U.S.C. Sec. 4821), this action is exempt from the Administrative Procedure Act (APA) (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation and delay in effective date.

Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by the APA or any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) are not applicable. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

List of Subjects

15 CFR Part 748

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Part 774

Exports, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, parts 748 and 774 of the Export Administration Regulations (15 CFR parts 730–774) are amended as follows:

PART 748—[AMENDED]

1. The authority citation for 15 CFR part 748 continues to read as follows:

2. Supplement 7 to part 748 is amended by revising the validated end-user entries for “Samsung China Semiconductor Co. Ltd.” and “Shanghai Huahong Grace Semiconductor Manufacturing Corporation,” listed under the country “China (People’s Republic of)” to read as follows:

SUPPLEMENT NO. 7 TO PART 748—AUTHORIZATION VALIDATED END-USER (VEU): LIST OF VALIDATED END-USERS, RESPECTIVE ITEMS ELIGIBLE FOR EXPORT, REEXPORT AND TRANSFER, AND ELIGIBLE DESTINATIONS

PART 774—[AMENDED]

3. The authority citation for 15 CFR part 774 continues to read as follows:

4. Supplement 1 to part 774 is amended in category 1 by revising ECCN 1C350 and ECCN 1C351 and in category 2 by revising ECCN 2B352 to read as follows:

Supplement No. 1 to Part 774—The Commerce Control List

<table>
<thead>
<tr>
<th>Category 1—Special Materials and Related Equipment, Chemicals, “Microorganisms,” and “Toxins”</th>
</tr>
</thead>
<tbody>
<tr>
<td>1C350 Chemicals that may be used as precursors for toxic chemical agents (see List of Items Controlled).</td>
</tr>
</tbody>
</table>

License Requirements

Reason for Control: CB, CW, AT

Control(s) | Country chart (see supp. No. 1 to part 738) | CB applies to entire entry. | CB Column 2. |
---|---|---|---|

CW applies to 1C350.b, and c. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons. A license is required, for CW reasons, to export or reexport Schedule 3 chemicals and mixtures identified in 1C350.b to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR). A license is required, for CW reasons, to export Schedule 3 chemicals and mixtures identified in 1C350.c to States not Party to the CWC, unless an End-Use Certificate issued by the government of the importing country has been obtained by the exporter prior to export. A license is required, for CW reasons, to reexport Schedule 3 chemicals and mixtures identified in 1C350.c to States not Party to the CWC, unless an End-Use Certificate issued by the government of the importing country is obtained by the exporter prior to export (see § 745.2 of the EAR for End-Use Certificate requirements). A consignee that receives a sample shipment under this exclusion may not resell, transfer, or reexport the sample shipment, but may use the sample shipment for any other legal purpose unrelated to chemical weapons.

a. Chemicals Not Eligible: A. [Reserved]

b. CWC Schedule 2 chemical or mixture identified in 1C350.b is eligible for sample shipment to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR) without a license.

c. Sample shipments that require an End-Use Certificate for CW reasons: No CWC Schedule 2 chemical or mixture identified in 1C350.b is eligible for sample shipment to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR) without a license.

d. Countries Not Eligible: Countries in Country Group E:1 of Supplement No. 1 to part 740 of the EAR are not eligible to receive sample shipments of any chemical controlled by this ECCN without a license.

e. Sample shipments that require an End-Use Certificate for CW reasons: No CWC Schedule 3 chemical or mixture identified in 1C350.c is eligible for sample shipment to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR) without a license, unless an End-Use Certificate issued by the government of the importing country is obtained by the exporter prior to export (see § 745.2 of the EAR for End-Use Certificate requirements).

f. Sample shipments that require a license for reasons set forth elsewhere in the EAR: Sample shipments, as described in this Note 1, may require a license for reasons set forth elsewhere in the EAR. See, in particular, the end-use/end-user restrictions in part 744 of the EAR, and the restrictions that apply to embargoed countries in part 746 of the EAR.
Hydrogen Fluoride (see 1C350.d.14 in the
more ingredients that do not react together
liquid or gaseous product made up of two or
other chemicals. (see 1C350.)
control levels for mixtures indicated in
chemicals identified in 1C350 in
contain one or more of the precursor
replacement reagents for such kits are
small quantities of chemicals identified in
may be shipped NLR (No License Required),
ingredients in a chemical mixture, include all
calculating the percentage, by weight, of
concentrations of AG-controlled chemicals:
license may be required for reasons set forth
in the EAR.
Note to mixtures: Calculation of
concentrations of AG-controlled chemicals:
Exclusion. No chemical may be added to
the mixture (solution) for the sole purpose of
reporting the Export Administration
Percent Weight Calculation. When
calculating the percentage, by weight, of
ingredients in a chemical mixture, include all
ingredients of the mixture, including those
that act as solvents.
3. Compounds. Compounds created with
any chemicals identified in this ECCN 1C350
may be shipped NLR (No License Required),
without obtaining an End-Use Certificate,
unless those compounds are also identified in
this entry or require a license for reasons set forth elsewhere in the EAR.
4. Testing Kits: Certain medical, analytical,
diagnostic, and food testing kits containing
small quantities of chemicals identified in
this ECCN 1C350, are excluded from the
scope of this ECCN and are controlled under
ECCN 1C395 or 1C995. (Note that
replacement reagents for such kits are
controlled by this ECCN 1C350 if the reagents
contain one or more of the precursor
chemicals identified in 1C350 in
concentration equal to or greater than the
control levels for mixtures indicated in 1C350.)

Technical Notes: 1. For purposes of this
entry, a “mixture” is defined as a solid,
liquid or gaseous product made up of two or
more ingredients that do not react together
under normal storage conditions.
2. The scope of this control applicable to
Hydrogen Fluoride (see 1C350.d.14 in the
List of Items Controlled) includes its liquid,
gaseous, and aqueous phases, and hydrates.
3. Precursor chemicals in ECCN 1C350 are
listed by name, Chemical Abstract Service
(CAS) number and CWC Schedule (where
applicable). Precursor chemicals of the same
structure formula (e.g., hydrates) are
controlled by ECCN 1C350, regardless of
name or CAS number. CAS numbers are
shown to assist in identifying whether a
particular precursor chemical or mixture is
controlled under ECCN 1C350, irrespective of
casual names. However, CAS numbers
cannot be used as unique identifiers in all
situations because some forms of the listed
precursor chemical have different CAS
numbers, and mixtures containing a
precursor chemical listed in ECCN 1C350
may also have different CAS numbers.

List Based License Exceptions (See Part 740 for a Description of All License Exceptions)
LVS: N/A
GBS: N/A
CIV: N/A

List of Items Controlled
Related Controls: See USML Category XIV(c)
for related chemicals “subject to the ITAR”
(see 22 CFR parts 120 through 130).
Related Definitions: See §770.2(k) of the EAR
for synonyms for the chemicals listed in
this entry.
Items:
a. [Reserved]
b. Australia Group-controlled precursor
chemicals also identified as Schedule 2
chemicals under the CWC, as follows, and
mixtures in which at least one of the
following chemicals constitutes 30 percent or
more of the weight of the mixture:
b.1. (C.A.S. #7784–34–1) Arsenic
trichloride;
b.2. (C.A.S. #76–93–7) Benzilic acid;
b.3. (C.A.S. #76–38–6) Diethyl
ethylphosphonate;
b.4. (C.A.S. #683–08–9) Diethyl
methylphosphonate;
b.5. (C.A.S. #15715–41–0) Diethyl
methylphosphonate;
b.6. (C.A.S. #2404–03–7) Diethyl-N,N-
dimethylphosphoroamide;
b.7. (C.A.S. #14180–75–5) N,N-
Diisopropylaminothanol hydrochloride;
b.8. (C.A.S. #5842–07–9) N,N-Diisopropyl-
N,N-Dimethylthioaniline thiol;
b.9. (C.A.S. #96–80–0) N,N-Diisopropyl-
N,N-Dimethylthioaniline thiol;
b.10. (C.A.S. #96–79–7) N,N-Diisopropyl-
N,N-Dimethylthioaniline thiol;
b.11. (C.A.S. #4261–68–1) N,N-
Diisopropyl-beta-aminoethyl chloride
hydrochloride;
b.12. (C.A.S. #6163–75–3) Dimethyl
ethylphosphonate;
b.13. (C.A.S. #756–79–6) Dimethyl
methylphosphonate;
b.14. (C.A.S. #677–45–0) N,N-
Dimethylaminoethyl dichloride;
b.15. (C.A.S. #1948–40–4) Ethyl
phosphonous dichloride [Ethyl phosphinyl
dichloride];
b.16. (C.A.S. #430–78–4) Ethyl phosphorus
difluoride [Ethyl phosphinyl difluoride];
b.17. (C.A.S. #1066–50–8) Ethyl
phosphoryl dichloride;
b.18. (C.A.S. #993–13–5) Methylphosphonic acid;
b.19. (C.A.S. #676–98–2) Methylphos-
phorothioic acid dichloride;
b.20. (C.A.S. #464–07–4) Pinacolyl alcohol;
b.21. (C.A.S. #1619–34–7) 3-Quinuclidinol;
b.22. (C.A.S. #111–48–8) Thioglycolic
acid;
c. Australia Group-controlled precursor
chemicals also identified as Schedule 3
chemicals under the CWC, as follows, and
mixtures in which at least one of the
following chemicals constitutes 30 percent or
more of the weight of the mixture:
c.1. (C.A.S. #762–04–9) Diethyl phosphite;
c.2. (C.A.S. #685–85–9) Dimethyl
phosphite (dimethyl hydrogen phosphite);
c.3. (C.A.S. #139–87–7) Ethylidithiolamine;
c.4. (C.A.S. #10025–87–3) Phosphorus
pentachloride;
c.5. (C.A.S. #10026–13–8) Phosphorus
monochloride;
c.6. (C.A.S. #7771–12–2) Phosphorus
trichloride;
c.7. (C.A.S. #10545–99–0) Sulfur
dichloride;
c.8. (C.A.S. #10025–67–9) Sulfur
monochloride;
c.9. (C.A.S. #7779–09–7) Thiophenol;
c.10. (C.A.S. #102–71–6) Trithianolamine;
c.11. (C.A.S. #122–52–1) Triethyl
phosphite;
c.12. (C.A.S. #121–45–9) Trimethyl
phosphite.
d. Other Australia Group-controlled
precursor chemicals not also identified as
Schedule 1, 2, or 3 chemicals under the
CWC, as follows, and mixtures in which at
least one of the following chemicals
constitutes 30 percent or more of the weight
of the mixture:
d.1. (C.A.S. #1341–49–7) Ammonium
hydrogen fluoride;
d.2. (C.A.S. #107–07–3) 2-Chloroethanol;
d.3. (C.A.S. #109–89–7) Diethylamine;
d.4. (C.A.S. #100–37–8) N,N-
Diethylamine;
d.5. (C.A.S. #585–57–1) Diethyl
carbophosphite;
d.6. (C.A.S. #298–06–1) O.O-Diethyl
phosphorothioate;
d.7. (C.A.S. #2465–65–8) O.O-Diethyl
phosphorothioate;
d.8. (C.A.S. #108–18–9) Di-isopropylamine;
d.9. (C.A.S. #124–40–3) Dimethylamine;
d.10. (C.A.S. #506–59–2) Dimethylamine
hydrochloride;
d.11. (C.A.S. #762–77–6) Ethyl
carbodiimide;
dichlorodiimide;
d.13. (C.A.S. #460–52–6) Ethyl
difluorodiimide;
fluoride;
Control(s)  Country chart (see Supp. No. 1 to part 738)

AT applies to entire entry.  AT Column 1.

License Requirement Notes: 1. All vaccines and "immunotoxins" are excluded from the scope of this entry. Certain medical products and diagnostic and food testing kits that contain biological toxins controlled under paragraph (d) of this entry, with the exception of toxins controlled for CW reasons under d.11 and d.12, are excluded from the scope of this entry. Vaccines, "immunotoxins", certain medical products, and diagnostic and food testing kits excluded from the scope of this entry are controlled under ECCN 1C991.

2. For the purposes of this entry, only saxitoxin is controlled under paragraph d.12; other members of the paralytic shellfish poison family (e.g., neosaxitoxin) are designated EAR99.

3. Clostridium perfringens strains, other than the epsilon toxin-producing strains of Clostridium perfringens described in c.12, are excluded from the scope of this entry, since they may be used as positive control cultures for food testing and quality control.

4. Unless specified elsewhere in this ECCN 1C351 (e.g., in License Requirement Notes 1-3), this ECCN controls all biological agents and "toxins," regardless of quantity or attenuation, that are identified in the List of Items Controlled for this ECCN, including small quantities or attenuated strains of select biological agents or "toxins" that are excluded from the lists of select biological agents or "toxins" by the Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, or the Centers for Disease Control and Prevention (CDC), U.S. Department of Health and Human Services, maintain controls on the possession, use, and transfer within the United States of certain items controlled by this ECCN (for APHIS, see 7 CFR 331.3(b), 9 CFR 121.3(b), and 42 CFR 73.4(b); for CDC, see 42 CFR 73.3(b) and 42 CFR 73.4(b)). See 22 CFR part 121, Category XIV, § 121.7 for CWC Schedule 1 chemicals that are "subject to the ITAR." (2) The Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, and the Centers for Disease Control and Prevention (CDC), U.S. Department of Health and Human Services, control pathogens and toxins that are "subject to the ITAR." Related Definitions: (1) For the purposes of this entry "immunotoxin" is defined as an antibody-toxin conjugate intended to destroy specific target cells (e.g., tumor cells) that bear antigens homologous to the antibody. (2) For the purposes of this entry "subunit" is defined as a portion of the "toxin".

Items: a. Viruses identified on the Australia Group (AG) "List of Human and Animal Pathogens and Toxins for Export Control," as follows:

1. African horse sickness virus,
2. African swine fever virus,
3. Andes virus,
4. Avian influenza (AI) viruses identified as having high pathogenicity (HP), as follows:
4.a. AI viruses that have an intravenous pathogenicity index (IVPI) in 6-week-old chickens greater than 1.2;
4.b. AI viruses that cause at least 75% mortality in 4- to 8-week-old chickens infected intravenously.

Note: Avian influenza (AI) viruses of the H5 or H7 subtype that do not have either of the characteristics described in 1C351.a.4 (specifically, 1C351.a.4.a or a.4.b) should be sequenced to determine whether other multiple basic amino acids are present at the cleavage site of the haemagglutinin molecule (HA0). If the amino acid motif is similar to that observed for other HPAl isolates, then the isolate being tested should be considered as HPAl and the virus is controlled under 1C351.a.4.

Technical Note: 1C351.a.41 includes reconstructed replication competent forms of the 1918 pandemic influenza virus containing any portion of the coding regions of all eight gene segments.

a.42. Rift Valley fever virus; a.43. Rinderpest virus; a.44. Rocio virus; a.45. Sabia virus; a.46. Seoul virus; a.47. Severe acute respiratory syndrome-related coronavirus (SARS-related coronavirus); a.48. Sheeppox virus; a.49. Sin Nombre virus; a.50. St. Louis encephalitis virus; a.51. Suid herpesvirus 1 (Pseudorabies virus; Aujeszky’s disease); a.52. Swine vesicular disease virus; a.53. Tick-borne encephalitis virus (Far Eastern subtype, formerly known as Russian Spring-Summer encephalitis virus—see 1C351.b.3 for Siberian subtype); a.54. Variola virus; a.55. Venezuelan equine encephalitis virus; a.56. Vesicular stomatitis virus; a.57. Western equine encephalitis virus; or a.58. Yellow fever virus.

b. Viruses identified on the APHIS/CDC “select agents” lists (see Related Controls paragraph #2 for this ECCN), but not identified on the Australia Group (AG) “List of Human and Animal Pathogens and Toxins for Export Control,” as follows:

b.1. [Reserved]; b.2. [Reserved]; or b.3. Tick-borne encephalitis virus (Siberian subtype, formerly West Siberian virus—see 1C351.a.53 for Far Eastern subtype).

c. Bacteria identified on the Australia Group (AG) “List of Human and Animal Pathogens and Toxins for Export Control,” as follows: c.1. Bacillus anthracis; c.2. Brucella abortus; c.3. Brucella melitensis; c.4. Brucella suis; c.5. Burkholderia mallei (Pseudomonas mallei); c.6. Burkholderia pseudomallei (Pseudomonas pseudomallei); c.7. Chlamydia psittaci (Chlamydomphila psittaci); c.8. Clostridium argentinense (formerly known as Clostridium botulinum Type G), botulinum neurotoxin producing strains; c.9. Clostridium baratii, botulinum neurotoxin producing strains; c.10. Clostridium botulinum; c.11. Clostridium butyricum, botulinum neurotoxin producing strains; c.12. Clostridium perfringens, epsilon toxin producing types; c.13. Coxiella burnetii; c.14. Franciscella tularensis; c.15. Mycoplasma capricolum subspecies capripneumoniae (“strain F38”); c.16. Mycoplasma mycoides subspecies mycoides S or small colony (a.k.a. contagious bovine pleuropneumonia); c.17. Rickettsia prowazekii; c.18. Salmonella enterica subspecies enterica serovar Typhi (Salmonella typhi); c.19. Shiga toxin producing Escherichia coli (STEC) of serogroups O26, O45, O103, O104, O111, O121, O145, O157, and other shiga toxin producing serogroups.

Note: Shiga toxin producing Escherichia coli (STEC) includes, inter alia, enterohaemorrhagic E. coli (HEC), verotoxin producing E. coli (VTEC) or verocytotoxin producing E. coli (VTEC).

c.20. Shigella dysenteriae; c.21. Vibrio cholerae; or c.22. Yersinia pestis.

d. “Toxins” identified on the Australia Group (AG) “List of Human and Animal Pathogens and Toxins for Export Control,” as follows, and “subunits” thereof:

d.1. Amin; d.2. Aflatoxins; d.3. Botulinum toxins; d.4. Cholera toxin; d.5. Clostridium perfringens alpha, beta 1, beta 2, epsilon and iota toxins; d.6. Conotoxins; d.7. Diacetoxyscirpenol; d.8. HT–2 toxin; d.9. Microcystins (Cyanогinosins); d.10. Moredin; d.11. Ricin; d.12. Saxitoxin; d.13. Shiga toxins (shiga-like toxins, verotoxins, and verocytotoxins); d.14. Staphylococcus aureus enterotoxins, hemolysin alpha toxin, and toxic shock syndrome toxin (formerly known as Staphyloccocus enterotoxin F); d.15. T–2 toxin; d.16. Tetrodotoxin; d.17. Viscumin (Vismum album lectin 1); or d.18. Volkensin.

e. “Fungi,” as follows:

e.1. Coxiella burnetii; or e.2. Coccidioides immitis; or e.3. Coccidioides posadaii.

* * * * * Category 2—Materials Processing

* * * * * 2B352. Equipment Capable of Use in Handling Biological Materials, as Follows (See List of Items Controlled).

List Based License Exceptions (See Part 740 for a Description of All License Exceptions)

LVS: N/A

GBS: N/A

CIV: N/A

List of Items Controlled

Related Controls: See ECCNs 1A004 and 1A995 for protective equipment that is not covered by this entry. Also see ECCN 9A120 for controls on certain “UAV” systems designed or modified to dispense an aerosol and capable of carrying elements of a payload in the form of a particulate or liquid, other than fuel “parts” or “components” of such vehicles, of a volume greater than 20 liters.

Related Definitions: (1) “Lighter than air vehicles”—balloons and airships that rely on hot air or on lighter-than-air gases, such as helium or hydrogen, for their lift. (2) “UAVs”—Unmanned Aerial Vehicles. (3) “VMD”—Volume Median Diameter.

a. Containment facilities and related equipment, as follows:

a.1. Complete containment facilities at P3 or P4 containment level.

b. Technical Note to 2B352.a.1: P3 or P4 (BL3, BL4, L. S. L4) containment levels are as specified in the WHO Laboratory Biosafety Manual (3rd edition, Geneva, 2004).

a.2. Equipment designed for fixed installation in containment facilities specified in paragraph a.1 of this ECCN, as follows:

a.2.a. Double-door pass-through decontamination autoclaves.

a.2.b. Breathing air suit decontamination showers.

a.2.c. Mechanical-seal or inflatable-seal walkthrough doors.

b. Fermenters and components as follows:

b.1. Fermenters capable of cultivation of micro-organisms or of live cells for the production of viruses or toxins, without the propagation of aerosols, having a total internal volume of 20 liters or greater.

b.2. Components designed for such fermenters, as follows:
b.2.a. Cultivation chambers designed to be sterilized or disinfected in situ;  
b.2.b. Cultivation chamber holding devices; or  
b.2.c. Process control units capable of simultaneously monitoring and controlling two or more fermentation system parameters (e.g., temperature, pH, nutrients, agitation, dissolved oxygen, air flow, foam control).

Technical Note to 2B352.b: 1. Fermenters include bioreactors (including single-use (disposable) bioreactors), chemostats and continuous-flow systems.

2. Cultivation chamber holding devices controlled by 2B352.b.2.b include single-use cultivation chambers with rigid walls.

c. Centrifugal separators capable of the separation of pathogenic microorganisms, without the propagation of aerosols, and having all of the following characteristics:

c.1. One or more sealing joints within the steam containment area;  
c.2. A flow rate greater than 100 liters per hour;  
c.3. “Parts” or “components” of polished stainless steel or titanium; and  
c.4. Capable of in-situ steam sterilization in a closed state.

Technical Note to 2B352.c: Centrifugal separators include decanters.

d. Cross (tangential) flow filtration equipment and “accessories”, as follows:

d.1. Cross (tangential) flow filtration equipment capable of separation of microorganisms, viruses, toxins or cell cultures having all of the following characteristics:

d.1.a. A total filtration area equal to or greater than 1 square meter (1 m²); and  
d.1.b. Having any of the following characteristics:

1. Objects having a germicidal effect.

a.2. Fully enclosed workspace where the operator is separated from the work by a physical barrier;

2. Able to operate at negative pressure;

b.2.c. Means to safely manipulate items in the workspace; and

b.2.d. Supply and exhaust air to and from the workspace is high-efficiency particulate air (HEPA) filtered.

Note 1 to 2B352.g.1: 2B352.g.1 does not control spray or fume equipment designed to be used with self-contained breathing apparatus.

Note 2 to 2B352.g.2: 2B352.g.2 does not control control isolators “specially designed” for barrier nursing or transportation of infected patients.

h. Aerosol inhalation equipment designed for aerosol challenge testing with microorganisms, viruses or toxins, as follows:

h.1. Whole-body exposure chambers having a capacity of 1 cubic meter or greater;

h.2. Nose-only exposure apparatus utilizing direct aerosol flow and having a capacity for the exposure of 12 or more rodents or between 2 and more animals other than rodents, and closed animal restraint tubes designed for use with such apparatus.

i. Spraying or fogging systems and “parts” and “components” therefor, as follows:

i.1. Complete spraying or fogging systems, “specially designed” or modified for fitting to aircraft, “lighter than air vehicles,” or “UAVs,” capable of delivering, from a liquid suspension, an initial droplet “VMD” of less than 50 microns at a flow rate of greater than 2 liters per minute;

i.2. Spray booms or arrays of aerosol generating units, “specially designed” or modified for fitting to aircraft, “lighter than air vehicles,” or “UAVs,” capable of delivering, from a liquid suspension, an initial droplet “VMD” of less than 50 microns at a flow rate of greater than 2 liters per minute.
